

How EU Regulation Affects You

An Update on Recent Developments

Why Keep Up with the EU?

- **To understand regulatory developments that affect us, our members and the community**
- **To explain our position in the broader Internet landscape to policymakers**
- **To provide technical information via consultative processes**
- **We work with an intelligence firm in Brussels**

So what's happening?

General Trends

- **More regulation**
- **More obligation on service providers**
- **Protection of critical infrastructure**
- **Driven by concerns over:**
 - Cybersecurity
 - Intermediary liability (Who's responsible for online content?)
 - Cooperation among law enforcement
 - Data economy

Cybersecurity Act

- **European Commission released proposal in September**
 - Creates EU-wide certification framework for ICT products, services and processes
 - Gives ENISA mandate as permanent EU agency
- **Next steps:**
 - Currently in negotiations between the Commission, Parliament and Council
 - Austrian Presidency wants to come to an agreement by end of 2018

Cybersecurity Act

- **Main points of discussion:**

- Mandatory vs voluntary approach for “essential service operators” and services considered “high risk”
- ENISA’s role being debated: coordinator or enforcer?

- **Proposed for 2021:**

- European Cybersecurity Industrial, Technology and Research Competence Centre
- EU Network of Cybersecurity Centres

Cybersecurity: NIS Directive

- **RIPE NCC as “essential service operator”?**
- **ccTLD operators included, but generally have their own provisions in place already**
- **Even if you’re not considered critical infrastructure yourself, you might have clients who are...**

Intermediary Liability: Copyright

- **Copyright Directive Reform under negotiation**
- **Includes provisions for upload filters for copyrighted material (highly criticised)**
- **Move toward delegating responsibility for online content to Internet industry**
- **Next steps:**
 - Public consultation on fighting illegal content online in June; results in coming months

Intermediary Liability: Terrorism

- **Proposal for Regulation on Preventing the Dissemination of Terrorist Content Online**
- **Focus is on hosting service providers**
- **Main elements:**
 - One hour to respond to removal requests from judicial authorities
 - Introduction of data preservation obligations
 - Scope covers micro, small and medium-sized enterprises
 - High sanctions for systematic non-compliance (4% global turnover)

Cooperation Among Law Enforcement: E-evidence Proposal

- **Makes it easier to gather evidence across borders throughout the EU**
- **Allows judicial authority in one Member State to obtain electronic evidence directly from a service provider in another Member State**

Cooperation Among Law Enforcement: E-evidence Proposal

- **Real-time interception debated but ruled out**
- **Notification system now being debated**
- **Next steps:**
 - Public hearing in Parliament on 27 November
 - Priority for the Austrian Presidency to reach agreement among Member States in 2018

Data Economy: ePrivacy

- **Parliament adopted its position in November 2017**
- **Member States still facing issues finding common position**
- **Restrictive approach regarding metadata and content data processing**
- **Current provisions negatively impact AI, IoT and big data**

Data Economy

- AI ethical guidelines expected by the end of the year (working with [AI Alliance](#))
- Commission will increase AI funding by €1.5 billion
- Proposal to update .eu TLD legal framework
